WITH 1100cc ENGINE
WEIGHS ONLY 740 LB.

\$3995 LESS ENGINE,
TRANSMISSION

\$4995 READY TO RACE
F, G, OR H MODIFIED

The Bobsy is a proven winner in SCCA's F, G, and H Modified classes, and in under-2-liter racing. . . . It was a Mark II Bobsy that Chuck Dietrich drove to the SCCA G Modified Championship for 1963. In the same car with a 1500cc pushrod engine, Dietrich placed 5th over-all in this year's Road America 500. . . . Its race-tested chassis is *all-aluminum* for weight savings not found in other racing machines. Each chassis has a lifetime warranty. . . . Other features:

fiberglass body, magnesium wheels, Airheart disc brakes, cockpit room for larger drivers. . . . A Bobsy can be supplied with a Ford engine (850, 1100, or 1500cc) or prepared for installation of any other under-2-liter powerplant (Alfa Romeo, Coventry Climax, etc.). . . . Parts, maintenance, and rebuilding services are available at the Bobsy "works" . . . For more information, contact:

Bobsy Division, 139 Koons Ave. Medina, O.
