

Note: The "Gross Misinformation" and quantities and dates in the margin are Jerry Mong's responses to Don. However, even some of Jerry's numbers are suspect. For instance, we know of nine SR-5s that were built, not just 3.

Dear Jerry:

I have corresponded with you before about my 2 SR-3 BOBSY's, chassis numbers 7 and 55?.

I am organizing a BOBSY REGISTER to promote the exchange of information between BOBSY owners and I am going to work up a short newsletter to send out to owners or others interested in your cars. According to an article in a 1975 AUTOWEEK, you built over 1,000 cars. This, and the success of the cars surely makes you one of the most significant constructors in the world of motorsports.

For the first newsletter, I would like to know the approximate number and dates of construction for cars you built over the years.

CAR TYPE	NUMBER BUILT	YEAR(S) BUILT
